November 27, 1974

Dr. Dan Natháns
The Johns Hopkins University
Bethesda, Maryland 21205

Dear Dan:

The day after I talked to you I called Ken Murray in Edinburgh. I was happy to hear from him and that he had dictated a letter that morning asking me to spend the year with him. I am looking forward to that year very much. Obviously the types of things that can be done in his lab would not be much different than what could be accomplished in your lab, however, the chance to spend time abroad and to meet a new group of people is very exciting.

I certainly appreciate your help. Dr. Murray stated that you wrote a letter which was very helpful to me. Obviously I wouldn't be in this area of research at all if it hadn't been for the excitement and interest which was generated during my fellowship with you. Having gotten a basic feeling for research has made it possible to think about things I wouldn't have dreamed of seven years ago. Thanks again and I look forward to discussing my sabbatical work with you.

Best Regards,

Roy D. Schmickel, M.D.
Associate Professor of Pediatrics
and Human Genetics

RDS/md

Dear Roy,

That's great news,
Thanks for letting me know about next year. Ken had also written to tell me he & Noreen looked forward to having you. Keep in touch with me about your work.
